3. Fill in the information and Click on Submit

What is My User ID?

What is My User ID? will search the database for a User ID that matches the Social Security Number (SSN), Date of Birth, First and Last name. Please use your full, legal name.

If found, you will be given the User ID that is associated with your user profile. If your profile has an email address, you can then proceed to the Forgot My Password process and retrieve a new password.

If there is no email address, you should contact the Help Desk. (The Forgot My Password process will inform you of a missing email address).

All four fields are required to find a match. If you do not feel you wish to use this process, contact the Help Desk.

*SSN:	<input type="text"/>	Example: 999-99-9999 (use dashes)
*First Name:	<input type="text"/>	Full, Legal First Name
*Last Name:	<input type="text"/>	Full, Legal Last Name
*Date of Birth:	<input type="text"/> 	Example: mm/dd/yyyy

* Note: If you are an international student, or have not previously submitted your Social Security Number, this process will not return your User ID. Contact the NDUS Help Desk at the address below for assistance.

North Dakota University System (NDUS) Help Desk

Phone: 1-866/457-6387 (toll free in the US and Canada)

Email: help.desk@nodak.edu

Website: www.help.nodak.edu

4. You will see your User ID.

User ID Match Found

Based on the provided information, your User ID is:

User ID: **W9991 1**

(If you know this is not correct, please report this to the NDUS Help Desk immediately.)

Now that you have your User ID, use the link on the menu column named 'Forgot My Password'. You will be prompted for a Response to a Hint Question. If the response is correct, a new, system generated password will be emailed to you at the email address you previously indicated. With these, you can now log into the ConnectND Portal.

If you do not remember your Hint Response, or you do not have an email address setup, contact the NDUS ConnectND Help Desk for further assistance.

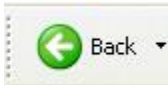

While the identity that is being verified is most likely you, we still have to be wary of identity theft. Even if the password were not stored as encrypted, the best solution seems to be give you enough of your information that you can complete the remaining steps securely. We don't mean this to be an inconvenience, rather as a safeguard.
