

**North Dakota Statewide Articulation Agreement
Nursing Academic Discipline Group
Fall 2023-Summer 2025**

Purpose: This agreement has been drafted by and is endorsed by the members of the North Dakota Nursing Academic Discipline Group. The following credits/courses are deemed transferable among the institutions listed. The listed institutions have agreed to transfer the course(s) to meet the requirements of the programs listed with corresponding courses. It is intended to facilitate student transfer and nursing program articulation among the following institutions:

Anatomy & Physiology

Course Title	Anatomy and Physiology (Includes labs)
Number of Semester Hours	8 SH (2 semesters)
Course Prerequisite(s), if any	
Course Description	Study of the structure and function of the human body.
Course Outcomes	<p>Upon completion of this course, the student will be able to:</p> <ul style="list-style-type: none"> • Understand the organization of the body from simple to complex, from the chemical level to the system level and the inter-relationships between them. • Gain an understanding of the role and importance of passive and active processes, membrane potentials, and feedback systems have in maintaining homeostasis. • Understand diagnostic treatments, procedures and technology used to identify and treat human disease and disorders. • Understand disease mechanisms in each system. • Understand the chemical basis of life and the anatomy and physiology of cells and tissues. • Understand body structure and function. • Understand the link between homeostatic imbalance and disease. • Organ systems that can be covered include musculoskeletal, respiratory, circulatory, nervous, integumentary, endocrine, lymphatic, digestive, reproductive, and urinary. • Gain a more thorough understanding of the inter-relationships and organizational hierarchy among the systems of the body. • Gain a more thorough understanding of role of feedback systems, osmosis/diffusion, electrolyte balance, acidosis/alkalosis in maintaining homeostasis. • Diagnostic procedures • Treatments of disease

Pathophysiology

Course Title	Pathophysiology
Number of Semester Hours	3-4 SH
Course Prerequisite(s), if any	One year of Anatomy and Physiology
Course Description	The focus of this course is to provide fundamental knowledge of the structural and functional changes that occur in the development of disease and alterations in function of human beings. The emphasis is on applying this knowledge to the signs and symptoms manifested as human responses.
Course Outcomes	Upon completion of this course, the student will be able to: <ul style="list-style-type: none"> • Distinguish between physiologic and pathologic processes • Demonstrate understanding of how these processes manifest in human beings • Apply pathophysiologic concepts as a framework for critical thinking when considering the clinical manifestations and responses to illness
Required of PN, RN, or Both	RN
Course Prefix & Number	
Articulation	NDUS Programs: DSU BIOL 357 (3) MISU HMS 243 (3)
	Tribal Programs: Private Programs: UJ Pathophysiology is integrated throughout the curriculum into NRSB 331, 333, and 424 UM: NUR 319 (3)

Nutrition

Course Title	Nutrition
Number of Semester Hours	2-3 SH
Course Prerequisite(s), if any	None
Course Description	The focus of this course is to study basic facts, principles, and concepts relating to nutrition throughout the lifecycle.
Course Outcomes	Upon completion of this course, the student will be able to: <ul style="list-style-type: none"> • Describe the fundamental principles of the science of nutrition. • Explain the functions and sources of essential nutrients • Apply the concepts of nutrition and diet therapy to promote optimum health for persons of all ages.
Required of PN, RN, or Both	Both

Health Assessment**Licensed Practical Nurse Programs**

Course Title	Health Assessment Across the Lifespan
Number of Semester Hours	3-4 SH
Course Prerequisite(s), if any	Admission to Nursing Program
Course Description	The focus of this course is the systematic collection of health-related data, using interview, psychosocial and physical assessment skills, across the lifespan. The nursing process will provide the framework to contribute to the plan of care based on the roles and responsibilities of the licensed practical nurse.
Course Outcomes	<p>Upon completion of this course, the student will be able to:</p> <ul style="list-style-type: none"> • Demonstrate beginning proficiency in interviewing, obtaining a health history, completing a physical examination, and performing specialized assessments with lifespan considerations. • Utilize appropriate communication techniques for data collection and documentation. • Discriminate between normal and abnormal findings. • (Demonstrate) the role and responsibilities of the licensed practical nurse in relation to health assessment findings.
Required of PN, RN, or Both	PN
Course Prefix & Number	
Articulation	Institutional discretion.

Registered Nurse Programs

Course Title	Health Assessment Across the Lifespan
Number of Semester Hours	3-4 SH
Course Prerequisite(s), if any	Admission to Nursing Program
Course Description	The focus of this course is the systematic collection of health-related data, using interview, psychosocial and physical assessment skills, across the lifespan.
